

Using OR

Question

1. Select the title and release_year for films released in 1990 or 1999 using only WHERE and OR.

Answer

-- Step 1: Find the title and year of films from 1990 or 1999

SELECT title, release_year

FROM films

WHERE release_year = 1990 OR release_year = 1999;

Code Explanation

1. SELECT title, release_year: Extracts the title and release_year columns.
2. FROM films: Specifies the table 'films' from which data is fetched.
3. WHERE release_year = 1990 OR release_year = 1999: Filters the rows to include films where the release year is either 1990 or 1999. The OR operator ensures either condition satisfies the filter.
