

Using BETWEEN with Budget Filter

Question

Build on your previous query to select only films with a budget over \$100 million, in addition to filtering for Spanish-language films released between 1990 and 2000.

Answer

-- Retrieve title and year of films with budgets over \$100 million, released between 1990 and 2000

```
SELECT title, release_year
```

```
FROM films
```

```
WHERE release_year BETWEEN 1990 AND 2000
```

```
AND budget > 100000000;
```

Code Explanation

1. SELECT title, release_year: Retrieves the title and release_year columns from the table.
2. FROM films: Specifies the table 'films' as the source of data.
3. WHERE release_year BETWEEN 1990 AND 2000: Filters the rows to include films where the release year is within the range 1990 to 2000, inclusive of both endpoints.
4. AND budget > 100000000: Adds another filter to include only films with a budget exceeding \$100 million.
