

# Using OR

## Question

1. Select the title and release\_year for films released in 1990 or 1999 using only WHERE and OR.

## Answer

-- Step 1: Find the title and year of films from 1990 or 1999

```
SELECT title, release_year
```

```
FROM films
```

```
WHERE release_year = 1990 OR release_year = 1999;
```

## Code Explanation

1. SELECT title, release\_year: Extracts the title and release\_year columns.
2. FROM films: Specifies the table 'films' from which data is fetched.
3. WHERE release\_year = 1990 OR release\_year = 1999: Filters the rows to include films where the release year is either 1990 or 1999. The OR operator ensures either condition satisfies the filter.
