Open-source advantages are widespread

The benefits of AICamp going open source with their breakthrough model can be split in three buckets:

- AICamp: benefits for the **company** open-sourcing the research
- The community (not including AICamp) gets benefit that are specific to AICamp open sourcing their research, first and foremost the ability to interact with the technology.
- Both: Benefiting both the company open-sourcing the research and the wider community

Instructions   100XP

Is the information an internal benefit, an external benefit, or does it benefit both?

⊗ ⊗   ♦ Take Hint (-30 XP)

Incorrect

Free to use is a great benefit for external parties! It doesn't benefit the company because they had access already.

Did you find this   ✓ Yes
helpful?   ✗ No

Open-source advantages are widespread

The benefits of AICamp going open-source with their breakthrough model can be split into three buckets:

1. **AICamp**: Benefits for the company open-sourcing the research.
2. **The community** (not including AICamp): Specific benefits to external developers and researchers.
3. **Both**: Benefits that apply to both AICamp and the wider community.

Categorized Benefits

AICamp
- The publicity achieved by releasing the model can attract talent.
- Enhance AICamp's reputation.

The Community (not including AICamp)
- Free to use, no vendor lock-in.
- Competitors getting access to cutting-edge technology.

Both
- Community collaboration.
- Rapid development and innovation.

Clarification
While 'free to use' is a great benefit for external parties, it does not benefit
AICamp internally as they already had access to the model.
